

SAFETY DATA SHEET

according to EC Directive 2001/58/EC

Date of issue: 23-08-2005
revised on: 14-05-2007
Page: 1 of 4

Trade name: WUXAL[®] Liquid
Product-No.: 11817

1 Identification of the preparation and Company

Preparation: NPK-fertilizer solution 8-8-6 with micronutrients
Description: Aqueous solution of nutrient salts.
Use: Fertilizer, preparation for plant nutrition
Manufacturer/Supplier: AGLUKON Spezialdünger GmbH & Co. KG Telephone: +49 (0)211 5064-0
Address: Heerdtter Landstraße 199 Telefax: +49 (0)211 5064-247
40549 Düsseldorf, Germany
Australian Distributor: AgNova Technologies Pty Ltd
Informing department: See chapter 16:
Emergency telephone (D/Berlin): Telephone No.: +49 (0)30 19240 (Day and Night)
Emergency telephone Australia: Telephone No.: 1800 033 111 (Day and Night)

2 Composition/Information on Ingredients

Harmful components:

Marking	EC-No.	CAS-No.	Content (%)	Danger symbol	R-phrases
Ammonium nitrate	229-347-8	6484-52-2	10 – 45	O: Oxidizing	8-9

Additional information: Full text of R-Phrases: see under section 16.

3 Hazards Identification

Hazards designation: None.
Particular hazards (R-phrases): No hazardous product as specified in Directive 67/548/EEC.
No hazardous product as specified in Directive 96/82/EC and 2003/105/EC (Seveso II).
Harmful effects/symptoms: In event of fire, the formation of nitrous gases is possible.
Additional information: Preparation as a solution harmless, but danger of explosion in the dry state if in mixture with inflammable materials.

4 First-Aid Measures

General hints: Remove soiled clothes.
after inhalation: Take out to the fresh air, rest quiet and warm. Medical assistance is necessary in case of difficulty in breathing.
of vapours/aerosols: Immediately wash affected skin regions thoroughly with soap and plenty of water.
after skin contact: Summon doctor if necessary.
after eyes contact: Thoroughly rinse eyes with lids wide apart under running water (protect the uninjured eye, remove contact lenses). Summon eye specialist if necessary.
after ingestion: Immediately rinse the mouth with water, then drink a lot of water. Consult the doctor in case of persistent trouble.
General hints: Remove soiled clothes.

5 Fire-Fighting Measures

Suitable extinguishing media: Water
Unsuitable extinguishing media: Do not use chemical extinguishers or foams or attempt to smother the fire with steam or sand.
Special risks: Preparation as a solution harmless, but danger of explosion in the dry state if in mixture with inflammable materials.
The material itself is hardly inflammable. Ambient fire may liberate hazardous vapours. If larger quantities of the product are on fire, the formation of nitrous gases, ammonia and phosphoric acid gases is possible.
Special equipment to protect firefighters: Do not stay in dangerous zone without suitable protecting clothes and self-contained breathing apparatus.
Other information: Contain escaping vapours with water.
Prevent fire-fighting water from entering surface water or groundwater.

6 Accidental Release Measures

Personal precautions: Wear suitable protecting clothes. Avoid product contact and formation of vapours/aerosols. Do not inhale vapours/aerosols. In event of vapours/aerosols wear respiratory protection, safety glasses and gloves.
Specific hazards: The material itself is harmless and hardly inflammable as. Ambient fire may liberate

SAFETY DATA SHEET

according to EC Directive 2001/58/EC

Date of issue: 23-08-2005

revised on: 14-05-2007

Page: 2 of 4

Trade name: WUXAL[®] Liquid
Product-No.: 11817

Special equipment to protect firefighters:	hazardous vapours. If larger quantities of the product are on fire, the formation of nitrous gases, ammonia and phosphoric acid gases is possible.
Other information:	Do not stay in dangerous zone without suitable protecting clothes and self-contained breathing apparatus.
Environmental precautions:	Contain escaping vapours with water. Prevent fire-fighting water from entering surface water or groundwater.
Methods for cleaning up/taking up:	Ensure that the product does not reach the ground-water, water bodies or the drainage system. Take up with absorption media;. Disposal of contaminated material as waste according to section 13.

7 Handling and Storage

Handling

Advice as to safe handling:

Wear suitable protecting clothes. Avoid product contact and formation of vapours/aerosols. Do not inhale vapours/aerosols. In event of vapours/aerosols wear respiratory protection, safety glasses and gloves.
Remove soiled and soaked clothes and wash hands and face after work (see section 8).

Advice to prevent fire and explosion:

Product rests to be cleared away by rinsing with water before starting fire and hot works on containers and devices. Fire and hot works can only be carried out by an expert after previous permission in writing or under permanent supervision of an expert.

Pumps must be so constituted and used that no hazardous reactions can occur. Pumps without stuffing boxes to be used only. Crystallized product to be dissolved again with plenty of water.

Storage

Stockrooms and containers required:

It is recommended to design stockrooms so that the product is well-protected from weather factors, solar radiation, heat up, dry up and impurities.
Keep stockrooms free from fireplaces and other ignition sources.
Keep containers densely closed and store in a cool dry place.
To fight a fire and decomposition keep care of a sufficient water supply.
Ensure high standard of housekeeping in the storage area.
Do not store in metal containers (corrosion risk).
Temperature in stockrooms not below +5 °C and above +40 °C.

Storage together with other materials:

Do not store together with:
- strong alkaline materials,
- strong acid materials,
- combustible materials,
- substances, which form perilous reactions with ammonium nitrate.
Do not store together with food and luxury food, beverage and animal feed.
More information see section 10.

8 Exposure Controls / Personal Protection

Exposure limits

The preparation contains no constituents with occupational exposure limits resp. biological occupational exposure limits requiring monitoring.

Personal protective equipment

Respiratory protection:

Not required. Respiratory protection necessary at vapour/aerosol and wet fog formation.

Hand protection:

Rubber or plastic gloves

Eye protection:

Safety goggles

Skin and body protection:

Closed working clothes

Preventive and hygiene measures:

Do not eat and drink at work. Remove immediately soiled and soaked clothes. Wash hands and face after work.

9 Physical and Chemical Properties

Appearance

Form/physical state:

Aqueous liquid

Colour:

Green

Odour:

Product-specific

Data relevant to safety

pH (original state):

Approx. 5,5

Method:

SAFETY DATA SHEET

according to EC Directive 2001/58/EC

Date of issue: 23-08-2005
revised on: 14-05-2007
Page: 3 of 4

Trade name: WUXAL[®] Liquid
Product-No.: 11817

pH at 10 g/l H ₂ O and 20°C:	Approx. 6,5
Change in physical state:	> 100° C evaporation of water
Boiling point/-range:	Not determined °C
Melting point/-range:	Not determined °C
Flash point:	Not applicable °C
Inflammability:	Not determined
Ignition temperature:	Not determined °C
Self-ignition:	The product is not spontaneously inflammable.
Fire-promotive properties:	The product is not fire-promotive.
Explosion hazard:	The product has no explosion hazardous properties.
Vapor pressure (at °C):	Not determined hPa
Density (at 20°C):	approx. 1,24 g/cm ³
Solubility in water (at 20°C):	To a very high degree. mg/l

10 Stability and Reactivity

Conditions to avoid: Direct solar radiation, heat up and dry up.
Temperatures above +40°C.

Materials to avoid: Strong alkaline materials, as alkalis, calcinated lime, slaked lime, cement, strong acid materials, as all acids, chlorate, chlorite, hypochloride, nitrite, combustible materials, as coal dust, oil, fuel, organic peroxide, metal powder, grain, paper, wood fiber, hay, straw, combustible packing materials.

Hazardous decomposition products: Reacts with alkalis setting ammonia free.

Thermic decomposition products: If larger quantities of the product are on fire, the formation of nitrous gases, ammonia, sulfuric acid gases and phosphoric acid gases is possible.

Further information: No decomposition if correctly used.
The product is stable under normal conditions.

11 Toxicological Information

Toxicological tests

Acute toxicity Toxicological data are not available.
Toxicological effects are unknown.
Property that must be anticipated on the basis with comparable preparations:
LD50 (oral, rat): >10.000 mg/kg
The following applies to ammonium nitrate: LD50 (oral, rat): 4820 mg/kg.

Further toxicological information

After inhalation of aerosols: Slight irritations of the mucous membranes and coughing.
After skin contact: Slight irritations.
After eye contact: Slight irritations.
After swallowing: Nausea and vomiting.
After uptake of large quantities: diarrhoea, disturbed electrolyte balance.
The following applies to nitrates in general:
methaemoglobinaemia after the uptake of large quantities.

Further data

Further hazardous properties cannot be excluded.
The product should be handled with the care usual when dealing with chemicals.
No toxicological effects are to be expected when the product is handled and used with due care and attention.

12 Ecological Information

General information: Fertilizer material.
Ensure that the product does not reach the ground-water, water bodies or the drainage system.

Further ecologic data: Depending on the concentration, phosphorus and/or nitrogen compounds may contribute to the eutrophication of drinking- water supplies.
The following applies to ammonium ions in general:
biological effects: fish: toxic as from 0.3 mg/l ;
animal nourishment for fish: toxic as from 0.3 mg/l .
No ecological problems are to be expected when the product is handled and used with due care and attention.

Water pollution class: WGK 1 - slightly water polluting preparation (own classification)

13 Disposal Considerations

SAFETY DATA SHEET

according to EC Directive 2001/58/EC

Date of issue: 23-08-2005
revised on: 14-05-2007
Page: 4 of 4

Trade name: WUXAL[®] Liquid
Product-No.: 11817

Product

Recommendation: Disposal of product rests in accordance with the official local disposal regulations.
According to european waste regulations:
Waste Code (EWC-No.): 061000
Waste Name: Wastes from the manufacture, formulation, supply and use of nitrogen chemicals, nitrogen chemical processes and fertiliser manufacture.

Contaminated packaging

Recommendation: Disposal of contaminated packages in accordance with the local official disposal regulations.
Cleaners: Water

14 Transport Information

Surface transport: No hazardous good.
River transport No hazardous good.
Sea navigation transport: No hazardous good.
Air transport: No hazardous good.
Further information: The transport regulations are cited according to international regulations and in the form applicable in Germany (GGVS/GGVE). Possible national deviations in other countries are not considered.

15 Regulatory Information

Labelling according to EC Directives

Danger symbol and designation: No labelling duty according to the EC-Hazardous Materials Regulation.
contains R-phrases: None
contains S-phrases: None

National regulations Germany

Particular labelling of certain preparations: According to the Hazardous Materials Regulation (Germany): „Fertilizer with ammonium nitrate, Group D“
Employment limitations: None
Interference regulations: None
Classification according to VbF: None
Technical Regulations Air: None
Storage class according to VCI-concept: 12 Liquid product with no fire risk.
Water pollution class: WGK 1 - slightly water polluting preparation (own classification)
Further regulations, limitations and prohibition regulations: None

16 Other information

Relevant R-Phrases (Number and full text)

For section 2: R 8 Contact with combustible material may cause fire.
R 9 Explosive when mixed with combustible material.

Reason for alteration

General update.
